Seventy-first session
First Committee
Agenda item 93
Developments in the field of information and telecommunications in the context of international security

Angola, Belarus, Burkina Faso, Chad, Chile, China, Cuba, Democratic People’s Republic of Korea, Democratic Republic of the Congo, Egypt, El Salvador, Eritrea, Ghana, Kazakhstan, Kenya, Kyrgyzstan, Lao People’s Democratic Republic, Madagascar, Malawi, Mongolia, Montenegro, Morocco, Myanmar, Nicaragua, Poland, Portugal, Russian Federation, Samoa, Senegal, Sierra Leone, Slovakia, Spain, Sri Lanka, Syrian Arab Republic, Thailand, Turkmenistan, Uzbekistan, Venezuela (Bolivarian Republic of), Viet Nam and Zimbabwe:
draft resolution

Developments in the field of information and telecommunications in the context of international security

The General Assembly,

Recalling also its resolutions on the role of science and technology in the context of international security, in which, inter alia, it recognized that scientific and technological developments could have both civilian and military applications and that progress in science and technology for civilian applications needed to be maintained and encouraged,

Bearing in mind the results of the World Summit on the Information Society at its first phase, held in Geneva from 10 to 12 December 2003, and at its second
phase, held in Tunis from 16 to 18 November 2005,¹ and recalling its resolution 70/125 of 16 December 2015,

Noting that considerable progress has been achieved in developing and applying the latest information technologies and means of telecommunication,

Affirming that it sees in this process the broadest positive opportunities for the further development of civilization, the expansion of opportunities for cooperation for the common good of all States, the enhancement of the creative potential of humankind and additional improvements in the circulation of information in the global community,

Noting that the dissemination and use of information technologies and means affect the interests of the entire international community and that optimum effectiveness is enhanced by broad international cooperation,

Expressing concern that these technologies and means can potentially be used for purposes that are inconsistent with the objectives of maintaining international stability and security and may adversely affect the integrity of the infrastructure of States to the detriment of their security in both civil and military fields,

Considering that it is necessary to prevent the use of information resources or technologies for criminal or terrorist purposes,

Noting the importance of respect for human rights and fundamental freedoms in the use of information and communications technologies,

Noting also the contribution of those Member States that have submitted their assessments on issues of information security to the Secretary-General pursuant to paragraphs 1 to 3 of resolutions 53/70, 54/49, 55/28, 56/19, 57/53, 58/32, 59/61, 60/45, 61/54, 62/17, 63/37, 64/25, 65/41, 66/24, 67/27, 68/243, 69/28 and 70/237,

Taking note of the reports of the Secretary-General containing those assessments,²

Considering that the assessments of Member States contained in the reports of the Secretary-General have contributed to a better understanding of the substance of issues of international information security and related notions,

Welcoming the effective work of the Group of Governmental Experts on Developments in the Field of Information and Telecommunications in the Context of International Security and the relevant outcome report transmitted by the Secretary-General,³

Stressing the importance of the assessments and recommendations contained in the report of the Group of Governmental Experts,

¹ See A/C.2/59/3 and A/60/687.
³ A/70/174.
Welcoming the conclusions of the Group of Governmental Experts, in its 2013 and 2015 reports,\textsuperscript{4,3} that international law, and in particular the Charter of the United Nations, is applicable and essential to maintaining peace and stability and promoting an open, secure, stable, accessible and peaceful information and communications technology environment, that voluntary and non-binding norms, rules and principles of responsible behaviour of States in the use of information and communications technologies can reduce risks to international peace, security and stability, and that, given the unique attributes of such technologies, additional norms can be developed over time,

1. Calls upon Member States:

(a) To be guided in their use of information and communications technologies by the 2015 report of the Group of Governmental Experts on Developments in the Field of Information and Telecommunications in the Context of International Security;\textsuperscript{3}

(b) To promote further, at multilateral levels, the consideration of existing and potential threats in the field of information security, as well as possible strategies to address the threats emerging in this field, consistent with the need to preserve the free flow of information;

2. Considers that the purpose of such measures could be served through further examination of relevant international concepts aimed at strengthening the security of global information and telecommunications systems;

3. Invites all Member States, taking into account the assessments and recommendations contained in the 2015 report of the Group of Governmental Experts, to continue to inform the Secretary-General of their views and assessments on the following questions:

(a) General appreciation of the issues of information security;

(b) Efforts taken at the national level to strengthen information security and promote international cooperation in this field;

(c) The content of the concepts mentioned in paragraph 2 above;

(d) Possible measures that could be taken by the international community to strengthen information security at the global level;

4. Welcomes the commencement of the work of the Group of Governmental Experts, established by the Secretary-General pursuant to resolution 70/237 on the basis of equitable geographical distribution, which, in accordance with its mandate, taking into account the assessments and recommendations contained in the 2015 report, should continue to study, with a view to promoting common understandings, existing and potential threats in the sphere of information security and possible cooperative measures to address them and how international law applies to the use of information and communications technologies by States, as well as norms, rules and principles of responsible behaviour of States, confidence-building measures and capacity-building and the concepts referred to in paragraph 2 above, and submit a

\textsuperscript{4} A/68/98.
report on the results of the study to the General Assembly at its seventy-second session;

5. *Decides* to include in the provisional agenda of its seventy-second session the item entitled “Developments in the field of information and telecommunications in the context of international security”.
