The inalienable right to develop research, production and uses of nuclear energy for peaceful purposes

Working paper submitted by the Group of Non-Aligned States Parties to the Treaty on the Non-Proliferation of Nuclear Weapons

1. The Group of Non-Aligned States Parties to the Treaty on the Non-Proliferation of Nuclear Weapons emphasizes once more that promoting international cooperation in the peaceful uses of nuclear energy for the realization of the inalienable right of all the parties to the Treaty to develop research, production and the use of nuclear energy for peaceful purposes without discrimination and in conformity with articles I and II of the Treaty, as stipulated in its article IV, constitutes one of the fundamental objectives of the Treaty. The Group strongly calls upon all States parties to the Treaty to fully respect this inalienable right and underscores that nothing in the Treaty shall be interpreted as affecting this right.

2. The Group of Non-Aligned States Parties to the Treaty reaffirms the importance of the right of States parties to participate in the fullest possible exchange of equipment, materials and scientific and technological information for the peaceful uses of nuclear energy, and their right to cooperation among themselves, in particular in the technological field, in contributing alone or with other States or international organizations to the further development of the applications of nuclear energy for peaceful purposes, with due consideration for the needs of the developing areas of the world.

3. The Group of Non-Aligned States Parties to the Treaty firmly believes that the full, effective and non-discriminatory implementation of article IV of the Treaty plays a crucial role in achieving the object and purpose of the Treaty. In this regard, the Group also firmly believes that any measure aiming at hampering, fully or partly, the fullest exercise of these inalienable rights, would seriously jeopardize the delicate balance between rights and obligations of States parties, in contravention with the Treaty’s object and purpose and would widen the gap between developed and developing countries in this field.

4. The Group of Non-Aligned States Parties to the Treaty recalls that the statute of the International Atomic Energy Agency (IAEA) also stipulates the right of member States to use atomic energy for peaceful purposes and to promote
socio-economic development by way of technical cooperation and the production of electrical power, with due consideration for the needs of developing countries. To ensure the realization of these goals, all States parties, particularly developed States, shall extend their assistance, as requested by States parties that are States members of IAEA, in the provision of nuclear equipment, material, technology and scientific and technological information for peaceful purposes, with a view to achieving the maximum benefits and applying pertinent elements of sustainable development in their activities for peaceful purposes.

5. In this connection, the Group of Non-Aligned States Parties to the Treaty recognizes the major and important role of IAEA in assisting States parties, particularly developing States, in planning for and using nuclear science and technology. The Group stresses the importance of nuclear knowledge-sharing and the transfer of nuclear technology to developing countries to sustain and further enhance their scientific and technological capabilities, thereby also contributing to their socio-economic development. Moreover, the Group underlines that the activities of IAEA in the field of technical cooperation, nuclear power and non-power applications contribute in an important way to meeting energy needs, improving human health, including the application of nuclear technology in cancer therapy, combating poverty, protecting the environment, developing agriculture, managing the use of water resources and optimizing industrial processes, and that these activities, as well as bilateral and other multilateral cooperation, contribute to achieving the objectives set forth in article IV of the Treaty.

6. The Group of Non-Aligned States Parties to the Treaty stresses that the IAEA Technical Cooperation Programme, as the main vehicle for the transfer of nuclear technology for peaceful purposes, should continue to be formulated and implemented in accordance with the statute of IAEA and the agreed guiding principles as contained in INFCIRC/267, as well as the decisions of IAEA policymaking organs. The Group reiterates that the current guidelines and criteria for the selection of technical cooperation projects are robust and effective, and that no additional criteria should be imposed for fulfilling the above-mentioned objectives.

7. The Group of Non-Aligned States Parties to the Treaty recalls that, in 2005, IAEA and its then-Director General, Mohamed ElBaradei, were awarded the 2005 Nobel Peace Prize, and reiterates the importance it attaches to the impartiality, professionalism and integrity of the Agency. While expressing its full confidence in that impartiality and professionalism, the Group strongly rejects any attempts by any State to politicize the work of the Agency, including its technical cooperation programme, in violation of its statute, as well as any pressure or interference in its activities that could jeopardize its efficiency and credibility. In this connection, the Group also expresses its rejection of any attempts by any State party to use the IAEA Technical Cooperation Programme as a tool for political purposes, which would be in violation of the statute of the Agency. The Group reaffirms that choices and decisions of each State party to the Treaty in the field of peaceful uses of nuclear energy should be fully respected without jeopardizing its policies or international cooperation agreements and arrangements for such uses and its fuel-cycle policies.

8. In this regard, while recognizing that a diverse portfolio of energy sources will be needed to allow access to sustainable energy and electricity resources in all
regions of the world, and that States parties may pursue different ways to achieve their energy security and climate protection goals, the Group of Non-Aligned States Parties to the Treaty once again acknowledges and reaffirms that each State party to the Treaty has the sovereign right to define its national energy policies, including fuel-cycle policies, in accordance with its national requirements and its rights and obligations under the Treaty.

9. The Group of Non-Aligned States Parties to the Treaty stresses that multilateral approaches to the nuclear fuel cycle, including proposals for assurance of supply in response to the needs of interested States, shall fully take into account all technical, legal, political and economic complexities surrounding these issues and be conducted through wide, integral, comprehensive and transparent multilateral consultations and negotiations. The multilateral approaches to the nuclear fuel cycle should be economically viable, sustainable, non-discriminatory, predictable and transparent under the auspices of IAEA and any other regional and multilateral forums. The Group also stresses that any decision on proposals regarding multilateral approaches to the nuclear fuel cycle shall be made by consensus, taking into account the interests of all member States, with the participation of all IAEA member States, and any proposal from IAEA must be consistent with its statute, without prejudice to the inalienable right of States parties to the Treaty, if they so decide, to develop a full national fuel cycle, according to its article IV.

10. The Group of Non-Aligned States Parties to the Treaty underlines that all the parties to the Treaty undertake to facilitate and have the right to participate in the fullest possible exchange of equipment, materials and scientific and technological information for the peaceful uses of nuclear energy. In this regard, the Group stresses particularly the obligation of developed countries to promote the legitimate need of the developing countries to nuclear energy by fully respecting this right with a view to achieving the widest benefits and applying pertinent elements of sustainable development in their activities.

11. The Group of Non-Aligned States Parties to the Treaty underlines the contribution that uses of nuclear energy can make to progress in general and to helping overcome the technological and economic disparities between developed and developing States parties to the Treaty in particular. The Group firmly believes that, as a fundamental principle, in all activities designed to promote the peaceful uses of nuclear energy, preferential treatment shall be given to the non-nuclear-weapons States parties to the Treaty, particularly taking into account the needs of developing countries.

12. The Group of Non-Aligned States Parties to the Treaty expresses its deep concern about the continued imposition and/or maintaining of limitations and restrictions on exports to developing countries of nuclear material, equipment and technology for peaceful purposes, despite such limitations and restrictions being inconsistent with the provisions of the Treaty. In this regard, the Group stresses that the technical cooperation and assistance provided by IAEA in meeting the needs of its member States for material, equipment and technology for the peaceful uses of nuclear energy shall not be subject to any political, economic, military or other conditions incompatible with the provisions of its statute. The Group therefore strongly calls for the immediate removal of any such restrictions or limitations. In the view of the Group, transfers of nuclear technology and international cooperation among States parties in conformity with the Treaty shall be supported and pursued.
in good faith without discrimination. The elimination of constraints that are inconsistent with the requirements of the Treaty would ensure that article IV of the Treaty is fully implemented with regard to facilitating the transfer of nuclear material, equipment and technological information for peaceful purposes among the States parties.

13. The Group of Non-Aligned States Parties to the Treaty emphasizes that the Treaty does not prohibit the transfer or use of nuclear technology, equipment or material for peaceful purposes based on their sensitivity, and only stipulates that such technology, equipment and material must be subject to full-scope IAEA safeguards. The Group firmly believes that fostering the development of the peaceful uses of nuclear energy by providing a framework of confidence and cooperation within which those uses can take place, is one of the fundamental objectives of the Treaty. Moreover, the Group emphasizes that cooperation to accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world is the core objective enshrined in the statute of IAEA. Accordingly, the Group strongly encourages all States parties to actively cooperate, among themselves and through IAEA, in the peaceful uses and applications of nuclear energy, including through international technical cooperation.

14. The Group of Non-Aligned States Parties to the Treaty emphasizes that proliferation concerns are best addressed through multilaterally negotiated, universal, comprehensive and non-discriminatory agreements. The Group further emphasizes that non-proliferation control arrangements should be transparent and open to participation by all States and should ensure that they do not impose restrictions on access by developing countries to material, equipment or technology for peaceful purposes, which such countries require for their continued development. Furthermore, such arrangements must pursue and implement, without exception, the condition of adherence to IAEA comprehensive safeguards and to the Treaty as a condition for the supply to or cooperation with States not party to the Treaty.

15. The Group of Non-Aligned States Parties to the Treaty remains deeply concerned about the ability of certain States not party to the Treaty to obtain, in particular from nuclear-weapon States, nuclear materials, technology and know-how to develop nuclear weapons. The Group strongly calls for the enforcement, without exception or further delay, of the total and complete prohibition, as stipulated in the Treaty, of the transfer of all nuclear-related equipment, information, material and facilities, resources or devices and the extension of assistance in the nuclear, scientific or technological fields to States not party to the Treaty.

16. The Group of Non-Aligned States Parties to the Treaty underscores that IAEA, under its statutory obligations, pursues the goals of technical cooperation in peaceful applications of nuclear energy as one of the three pillars of its activities. In order to meet such goals, as enshrined in the statute of IAEA and in the Treaty, IAEA has to maintain a balance between technical cooperation and other activities. The Group believes that all States parties to the Treaty that are States members of IAEA have to ensure that the Technical Cooperation Programme remains firm and sustainable through sufficient, assured and predictable financial and human resources. In this regard, the efficacy of the Programme can best be achieved by
ensuring its formulation and strategies are in strict accordance with the needs and the requests of developing countries.

17. The Group of Non-Aligned States Parties to the Treaty affirms the need to strengthen the radiological safety and protection systems at facilities utilizing radioactive materials and at radioactive waste management facilities, including the safe transportation of these materials. The Group reaffirms the need to strengthen existing international regulations relating to the safety and security of transportation of such materials. While reiterating the need to take necessary measures to prevent any dumping of nuclear or radioactive wastes, the Group calls for the effective implementation of the Code of Practice on the IAEA International Transboundary Movement of Radioactive Waste as a means of enhancing the protection of all States from the dumping of radioactive wastes on their territories.

18. The Group recognizes that the primary responsibility for nuclear safety rests with individual States. The Group reaffirms the central role of IAEA in nuclear safety-related matters, including through the establishment of nuclear safety standards. The Group stresses that IAEA must retain centrality in this field, owing to its mandated functions and long-standing expertise. The Group stresses that any possible review of nuclear safety standards at the global level must be carried out within IAEA in an inclusive, gradual and transparent manner, with the guidance and participation of and in consultation with all member States, and shall incorporate the views of all member States. The Group also calls for the implementation of the Nuclear Safety Action Plan endorsed by the General Conference of IAEA in September 2011.

19. The Group emphasizes that measures and initiatives aimed at strengthening nuclear safety and nuclear security must not be used as a pretext or lever to violate, deny or restrict the inalienable right of developing countries to develop research, production and use of nuclear energy for peaceful purposes without discrimination.

20. The Group of Non-Aligned States Parties to the Treaty emphasizes that non-proliferation must be pursued and implemented without exception through the strict observance of and adherence to IAEA comprehensive safeguards and to the Treaty as a condition for any cooperation in the nuclear area with States not party to the Treaty. In the view of the Group, new supply arrangements for the transfer of source or special fissionable material or equipment or material designed or prepared for the processing, use or production of special fissionable material to non-nuclear-weapon States should require, as a necessary precondition, acceptance of IAEA full-scope safeguards and internationally legally binding commitments not to acquire nuclear weapons or other nuclear explosive devices.

21. In this regard, the Group of Non-Aligned States Parties to the Treaty underscores the strong call by the 2010 Review Conference of the Treaty that all States parties shall ensure that their nuclear-related exports do not directly or indirectly assist the development of nuclear weapons or other nuclear explosive devices and that such exports are in full conformity with the objectives and purposes of the Treaty as stipulated particularly in its articles I, II and III, and with the decision on the principles and objectives of nuclear non-proliferation and disarmament adopted in 1995 by the Review and Extension Conference of the Treaty.
22. The Group of Non-Aligned States Parties to the Treaty once again reaffirms the inviolability of peaceful nuclear activities and that any attack or threat of attack against peaceful nuclear facilities, operational or under construction, poses a great danger to human beings and the environment and constitutes a grave violation of international law, the principles and purposes of the Charter of the United Nations and the regulations of IAEA. In this regard, the Group recognizes the need for a comprehensive multilaterally negotiated instrument prohibiting attacks or the threat of attacks on nuclear facilities devoted to peaceful uses of nuclear energy. Moreover, the Group strongly calls upon all States, in accordance with the purpose and principles of the Charter of the United Nations, to refrain from attacks or the threat of attacks on nuclear facilities, operational or under construction, devoted to peaceful purposes.

23. The Group of Non-Aligned States Parties to the Treaty expresses its serious concern over certain unilateral, politically motivated attempts to hamper the exercise of the inalienable rights of States parties to develop research, production and use of nuclear energy for peaceful purposes, and believes, in this regard, that interpretations in the application of safeguards shall not be used as a tool to that end. In the view of the Group, article III of the Treaty, while providing for the undertaking by each non-nuclear-weapon State to conclude safeguards agreements with IAEA, is equally explicit in articulating that the implementation of such safeguards shall be in a manner designed to comply with article IV of this Treaty, and to avoid hampering the economic or technological development of the parties or international cooperation in the field of peaceful nuclear activities, including the international exchange of nuclear material and equipment for the processing, use or production of nuclear material for peaceful purposes.

24. The Group of Non-Aligned States Parties to the Treaty, while stressing the importance of safeguards and the significance of maintaining the principles of confidentiality regarding safeguards, underlines the vital responsibility of IAEA in this regard. Since the Agency is the only organization that receives highly confidential and sensitive information on the nuclear facilities of member States, and given the undesirable incidents of leaks of such information, the Group emphasizes that the confidentiality of such information shall be fully respected and that the regime, for its protection, needs to be highly strengthened. In the view of the Group, safeguards-related confidential information should not be provided in any way to any party not authorized by the Agency.

25. The Group of Non-Aligned States Parties to the Treaty is determined to propose, during the 2015 Review Process of the Treaty, measures to protect fully the inalienable rights of all States parties to the Treaty to develop research, production and use of nuclear energy for peaceful purposes without discrimination.
