New York, 3-28 May 2010

**Note verbale dated 8 April 2010 from the Permanent Missions of Australia and Japan to the United Nations addressed to the President of the Conference**

The Permanent Missions of Australia and Japan to the United Nations present their compliments to the President of the 2010 Review Conference and have the honour to transmit herewith the text entitled “A new international consensus on action for nuclear disarmament”, proposed by the International Commission on Nuclear Non-proliferation and Disarmament, analogous to the thirteen practical steps from the Final Document of the 2000 Review Conference (see annex).

The Permanent Missions of Australia and Japan to the United Nations have the further honour to advise that the Commission was launched as a joint initiative of the Governments of Australia and Japan in September 2008. The Commission is an independent enterprise, composed of 15 Commissioners worldwide, including Co-Chairs Gareth Evans and Yoriko Kawaguchi. On 15 December 2009, the Co-Chairs presented the report of the Commission to Prime Ministers Kevin Rudd and Yukio Hatoyama in Tokyo as the consensus outcome of the activities of the Commission.

The Permanent Missions of Australia and Japan to the United Nations request that the present note and its annex be circulated as a working paper of the 2010 Review Conference.
Annex

Report of the International Commission on Nuclear Non-proliferation and Disarmament

A new international consensus on action for nuclear disarmament

Box 16-1 of the Report of the International Commission on Nuclear Non-proliferation and Disarmament

The States party to the Nuclear Non-Proliferation Review Conference in May 2010 to agree:

On the Objective: A World Free of Nuclear Weapons

1. To reaffirm the unequivocal undertaking by the nuclear-weapon States to accomplish the total elimination of their nuclear arsenals leading to nuclear disarmament to which all States parties are committed under Article VI.

2. On the need for nuclear-armed States not party to the Nuclear Non-Proliferation Treaty to make a similar undertaking to accomplish ultimately the total elimination of their nuclear arsenals, and to acknowledge the universal and binding nature of the norms against testing, acquisition, and use or threat of use of nuclear weapons otherwise than for defence against nuclear attack.

On Key Building Blocks: Banning Testing and Limiting Fissile Material

3. On the importance and urgency of signatures and ratifications, without delay and without conditions and in accordance with constitutional processes, to achieve the early entry into force of the Comprehensive Nuclear-Test-Ban Treaty.

4. On a continuing moratorium on nuclear-weapon-test explosions or any other nuclear explosions pending entry into force of that Treaty.

5. On the need to maintain and increase support for the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization in further developing the treaty verification regime.

6. On the need to negotiate to an early conclusion in the Conference on Disarmament a non-discriminatory, multilateral and internationally and effectively verifiable treaty banning the production of fissile material for nuclear weapons or other nuclear explosive devices.

7. On the need for all nuclear-weapon States, and other nuclear-armed states, to declare or maintain a moratorium on the production of fissile material for weapon purposes pending the conclusion of this treaty.

8. On the need for nuclear-weapon States and other nuclear-armed States to make arrangements to place fissile material designated by each of them as no longer required for military purposes under IAEA or other relevant international verification and arrangements for the disposition of such material for peaceful purposes.

On Specific Steps toward Nuclear Disarmament

9. On the need for nuclear-weapon States, and other nuclear-armed states, to make an early commitment to not increasing their nuclear arsenals, and take whatever steps are necessary, unilaterally, bilaterally or multilaterally, to achieve nuclear disarmament, in a way that promotes international stability and is based on the principle of undiminished security for all.

10. On the need to set as an interim objective the achievement in the medium term, as soon as possible and no later than 2025, of a world in which:

(a) the number of all nuclear weapons, of whatever size, role or deployed status, is reduced to a small fraction of those in existence in 2010;

(b) the doctrine of every State with nuclear weapons is firmly committed to no first use of them, on the basis that their sole remaining purpose is to deter the use of nuclear weapons by others; and

(c) the deployment and launch-alert status of those weapons is wholly consistent with that doctrine.

11. On the particular need for leadership from, and cooperation between, those nuclear-weapon States which possess the greatest numbers of nuclear weapons in agreeing early on deep reductions, and making sustained efforts to continue such reductions for all classes of weapons.

12. On the need for all the nuclear-weapon States, and other nuclear-armed States, to make further efforts to reduce their nuclear arsenals, and act early to prepare the ground – through studies, strategic dialogues with each other, and preparatory work in the Conference on Disarmament – for a multilateral disarmament process.

13. On the need for the nuclear-weapon States, and other nuclear-armed States, to accept and announce as soon as possible a diminishing role for nuclear weapons in their security policies to minimize the risk that these weapons will ever be used and to facilitate the process of their total elimination.

14. On the need for the nuclear-weapon States, and other nuclear-armed States, to as soon as possible give unequivocal negative security assurances, endorsed by the UN Security Council, that they will not use nuclear weapons against non-nuclear-weapon States not determined by the Security Council to be in non-compliance with the Nuclear Non-Proliferation Treaty.

15. On the need for the nuclear-weapon States, and other nuclear-armed states, to take concrete measures in relation to the operational status of nuclear weapons systems to the extent possible at each stage of the disarmament process, in particular to lengthen launch decision times and to generally reduce the risk of accident or miscalculation.

On Transparency

16. On the need for increased transparency by the nuclear-weapon States, and other nuclear-armed States, with regard to nuclear weapons capabilities, in the implementation of arms control agreements and as a voluntary confidence-building measure to support further progress on nuclear disarmament.

On Accountability

17. To all States with significant nuclear programs making regular reports, to the relevant United Nations organs and within the framework of the strengthened review process for the Nuclear Non-Proliferation Treaty, on the implementation of their disarmament and non-proliferation obligations and programs including, in the case of nuclear-weapon States and other nuclear-armed States, on their nuclear arsenals, fissile material not required for military purposes, and delivery vehicles.
