

EXPLANATION OF VOTE

Draft Resolution L. 20: Missiles

Mister Chairman,

The United States has made clear repeatedly that it disagrees with the inclusion of the item entitled "Missiles" on our agenda. Consequently, our Delegation again has voted against this decision.

However, as the United States is participating in the Governmental Group of Experts called for last year, our delegation would like to reiterate that we continue to urge the current, third, panel on this subject to draw extensively on the work of the previous two panels, and to complete its work promptly.
